Customer View

This page shows a high level prototype of the Ski Equipment Groups and Packages Ordering pages for customers.
A calendar is used for selecting start date and end date for booking the equipments.

Tables for editing could be found here:

Load available packages and equipments after selecting

Choose ski only

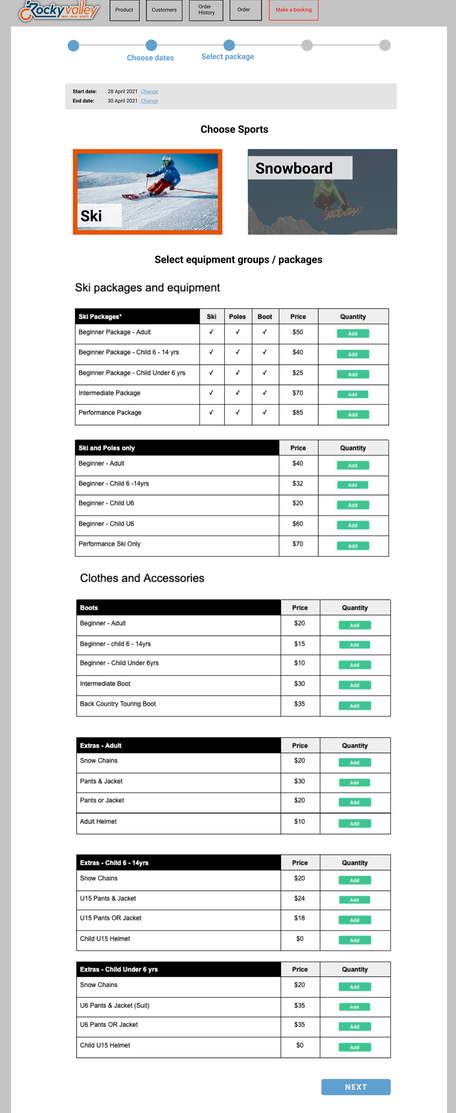
Choose snowboard only

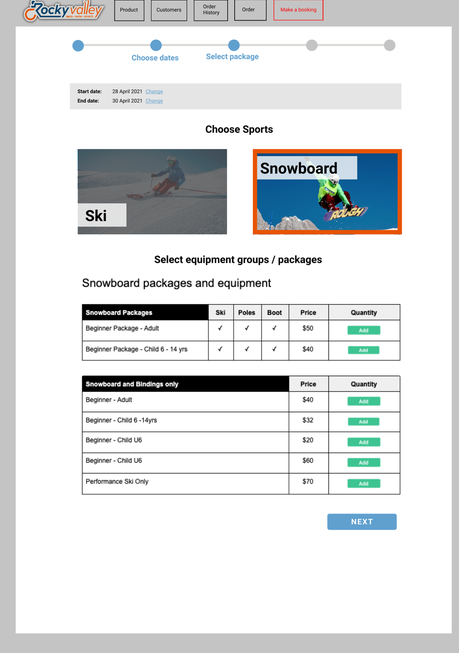
Choose both ski and snowboard

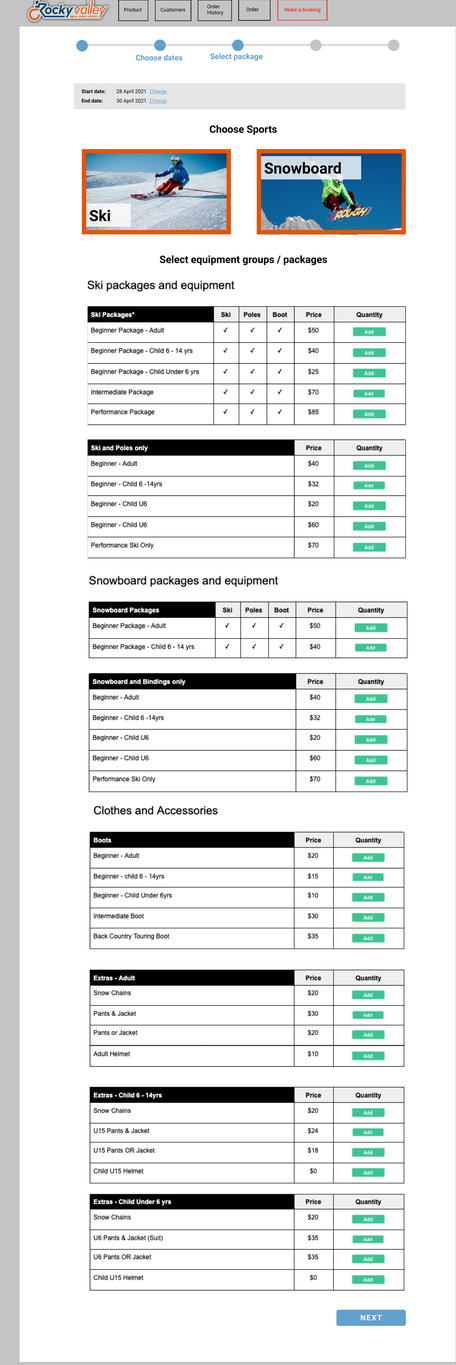
(Customer Hiring Page) - Implementation main depends on team 2, our role is to supply them with data regarding the available packages, based on the date selected

1. Customer can pick start date and end date on the calendar for their booking (Reference Image 1)
2. System returns ski and snowboard panel for customer to select
3. Customer select whether they want to ski or snowboard, clicks Next
4. System returns a table containing package types, corresponding to Ski or Snowboard
   a. Package types, equipment included, price adjusted by booking duration, quantity to book
5. Customer increases/decreases the quantity of the package types they want
   a. Maximum quantity depends on package availability
6. Customer clicks "Next" (Reference Image 2, step 2)
7. System/backend returns data: (Reference Images 3-4)
   a. Information for each package - Images, description, category (downhill, XC classic, etc).
      i. For example: the beginner package - adult section
   b. Extra items associated with the package and the price
   c. Quantity of package category, depends on date available

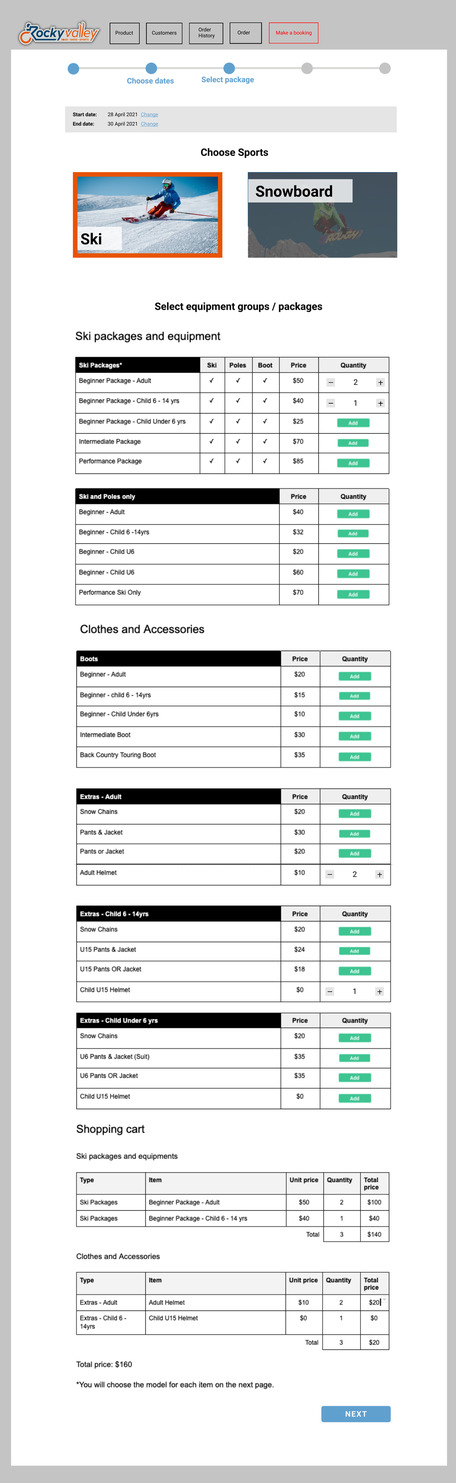
- We leave the frontend displaying and booking details/fields for team 2 to implement







After adding packages / equipments to the shopping cart, a summary will be available at the bottom of the page before proceeding to the next page



The Add button changes to quantity after first click
