## User Stories Version 3.0

ID	As a	I want to	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1: Different displayed webpages of user roles								
1.1	Developer	Make customers and admin have different authorities.	I can make them with different home pages and navigation bar items.	Must have	I want to login the customer or admin account	I enter the username and password and click "login"	the web page shows the main page of customer or admin	2
Epic 2: Account management								
1.2	Admin	Make admin have customer account existing management	I can search and disable customer accounts.	Must have	I want to manage customer accounts	I click "customer account management" button on navigation bar of admin homepage	the web page shows all the information of the account, the search bar and "disable" button	1
1.3	Customer	Make registered customers manage the information about their account.	I can update the old information in the account.	Must have	I want to manage my personal account information	I click the "edit account" button	the web page shows all the information of my account and the "update" button	2
1.6	Customer	Use part of personal information when hiring	Use address, name and din directly when hiring orders.	Must have	I want to use part of personal information to pick up suitable equipment and generate a hiring contract	I click the "my account" button	the web page shows the personal information that need to fill in account and "DIN setting" button	2
Epic 3: Companion management process								
1.4	Customer	Manage groups in group list	I can rename a group and delete the whole group	Must have	I want to manage a recipient	I click the "add" or "edit" button in the list	the web page shows the information form of the recipient.	2
1.5	Customer	Add or edit the friends into each group	I can directly invite the entire group of people when hiring.	Must have	I want to manage the members of each group	I click the "add" or "delete" button for the friend in the group	the web page shows the new friends list of the group	2

Epic 4: Register process								
1.7	Customer	Make online customers register through the web page or in-store customers register using the computer in-store.	I can create a registered customer account.	Must have	I want to register a customer account	I edit personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.8	Admin	Register as an admin	I can register as an admin through a separate web page.	Must have	I want to register a admin account	I edit personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.9	Guest	Register as a registered customer.	I can create a registered customer account.	Should have	I want to finish my hiring order	I click the create button and write information on the register page and click submit.	the web page shows the registration process	1

## User Stories Version 2.0

ID	As a	I want to	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1: User roles assigned by admin								
1.1	Admin	Make customer and admin have different authorities.	I can make them with different panels.	Must have	I want to login the admin account	I enter the admin name and password and click "login"	the web page shows the main page of admin	2
Epic 2: Account management								
1.2	Admin	Make admin have account management authority.	I can add, update or delete or customer.	Must have	I want to manage customer accounts	I click "customer account management" button	the web page shows all the information of the account and the "edit" and "delete" button	1
1.3	Customer	Make registered customer manage the information about their account.	I can update the old information in the account.	Must have	I want to manage my personal account information	I click the "edit account" button	the web page shows all the information of my account and the "update" button	2
1.6	Customer	Add the personal information that is needed for the hiring process.	use information directly when I create a hiring order.	Must have	I want to pick up suitable equipment	I click the "my account" button	the web page shows the personal information that need to fill in account and "DIN setting" button	2
Epic 3: Companions and group buying process								
1.4	Customer	Add the friends into the "Friend List".	I can know the how many friends that I have invited or want to invite for hiring.	Must have	I want to add some friend information into the order easily	I enter the user email and click the "search" button	the web page shows the results which meet the search requirements	2
1.5	Customer	Allocate the contacts into different groups.	organize the list clearly.	Must have	I want to make contacts into different groups at the list	I click the "add a new group" button and choose the members that belong to the group	the contact list contains more groups and the web page shows all the groups in the contact list	2
Epic 4: Companions and group buying process								
1.7	Customer	Make online customers register through the web page or in-store customers register using the computer in-store.	I can create a registered customer account.	Must have	I want to register a customer account	I edit personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.8	Admin	Make admin register new in-store customers who have the same web page with online customers.	I can create a registered customer account.	Must have	I want to help customer to register an account	I click the create button, then the customer edits personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.9	Guest	Register as a registered customer.	I can create a registered customer account.	Should have	I want to finish my hiring order	I click the create button and write information on register page and click submit.	the web page shows the result of the registration process	1

## User Stories Version 1.0

					Given	When	Then	
Epic 1: User roles assigned by admin								
1.1	Admin	Make customer and admin have different authorities.	I can make them with different panels.	Must have	I want to login the admin account	I enter the admin name and password and click "login"	the web page shows the main page of admin	2

Epic 2: Account management								
1.2	Admin	Make admin have account management authority.	I can add, update or delete or customer/guest.	Must have	I want to manage customer accounts	I click "customer account management" button	the web page shows all the information of the account and the "edit" and "delete" button	1
1.3	Customer	Make registered customer manage the information about their account.	I can update the old information in the account.	Must have	I want to manage my personal account information	I click the "edit account" button	the web page shows all the information of my account and the "update" button	2
1.6	Customer	Add the personal information that is needed for the hiring process.	use information directly when I create a hiring order.	Must have	I want to pick up suitable equipment	I click the "my account" button	the web page shows the personal information that need to fill in account and "DIN setting" button	2
Epic 3: Companions and group buying process								
1.4	Customer	Add the companions into the "Friend List".	I can know the how many friends that I have invited or want to invite for hiring.	Must have	I want to add some friend information into the order easily	I enter the user email and click the "search" button	the web page shows the results which meet the search requirements	2
1.5	Customer	Allocate the contacts into different groups.	organize the list clearly.	Must have	I want to make contacts into different groups at the list	I click the "add a new group" button and choose the members that belong to the group	the contact list contains more groups and the web page shows all the groups in the contact list	2
Epic 4: Companions and group buying process								
1.7	Customer/Guest	Type in the person name and surname to search if I have records on the system	I can use the existing information or fill in the information needed.	Must have	I want to open the registration page	I fill in my name and click the Search button	the web page displays the information that I need to fill in	1
1.8	Customer	Make online customers register through the web page or in-store customers register using the computer in-store.	I can create a registered customer account.	Must have	I want to register a customer account	I edit personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.9	Admin	Make admin register new in-store customers who have the same web page with online customers.	I can create a registered customer account.	Must have	I want to help customer to register an account	I click the create button, then the customer edits personal information in registration page and click the next button	the web page shows the result of the registration process	1
1.10	Guest	Register as a registered customer.	I can create a registered customer account.	Should have	I want to finish my hiring order	I click the "check out as guest" button and edit personal information in registration page and click the next button	the web page shows the result of the registration process	1

## Project Requirements: Team 2

## User Stories Classification

MoSCoW Priority		
M	Must have	Non-negotiable product needs that are mandatory for the team.
S	Should have	Important initiatives that are not vital but add significant value.
C	Could have	Nice to have initiatives that will have a small impact if left out.
W	Will not have	Initiatives that are not a priority for this specific time-frame.

## User Stories *Version 2.0*

ID	As	I Want To	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1: Customer Accounts Management								

2.1	Staff	Check if the user is registered based on name or email	I can select a registered account	M	I want to search whether the customer is existed in the system.	I enter the user's full name or email address.	Show all accounts that match in the customer list.	1
2.2	Staff	Create unregistered customer account manually if the customer is not in the guest list, then add it to the hiring list.	Members in my group can hire the equipment of suitable sizes next time without providing their information again.	M	I want to hire equipments for my group members, so I need to set up accounts for my group members.	I click on "Add a Skier" button.	The website should display a form to fill in some personal information (name, birthday, height, weight etc.). After filling in the form, the website should stay in same page.	4
2.3	Staff	Select customer account from the Guest, and add it to the Hiring list.	Members in my group can hire the equipment of suitable sizes this time without providing their information.	M	I want to hire equipments for my group members.	I click an account in the guest list.	The website display all pre-set guests in groups and added to the Hiring list by multiple-choice.	2
Epic 2: Hiring Process								
2.4	Staff	Select equipment packages from a list of equipments into the shopping basket  Enter additional information (Size, extra equipment...) for packages that are chosen in the hiring form	The customer gets a comfortable appropriate ski equipments.	M	Customer wish to hiring some equipment packages and have submitted the hiring form	The staff have filled all the additional info needed and click on "Select" button.	the website stay in the page, but the shopping basket page should includes the item I just add.  The website should generate the contact which listed the packages just selected.	2
2.5	Staff	Delete an item that has been added	Remove unwanted items from the shopping basket	C	Customer does not want to hiring some equipment packages any more.	I click on "Remove" button.	The website should display the shopping basket pages which does not include the item I just removed.	2
2.6	Staff	Generate and print the hiring contract	I am able to create the evidence which shows the equipment has been hired by the customer.	M	Customer needs to sign a hiring contract before completing hiring.	I click on "Tax invoice" button.	The website should display the Hiring Contract and print the 3 layer paper.	2
2.7	Customer	Sign the hiring contract on the screen	I am able to keep an electronic copy of the hiring contract	W	I want to sign the contract on the screen.	I click on "Signature" button.	The website display a place to let me sign and save it.	2
2.8	Customer	Submit a hiring form	I can rent ski packages	M	I have selected a list of packages and filled up my personal information	I click on "Submit" button.	The website will submit my order to the staff so that they complete my order for me.	2
Epic 3: Checkout Process								
2.8	Customer	Complete the payment by POS machine	I can grab the equipment and products I want.	M	Customer want to pay for their hiring items.	I click on "Check Out" button.	Amount of money due should be sent to the POS machine for purchase. After paying with a bank card, the POS machine will notify the webpage of the successful payment and the website will redirect me to my completed order page.	2
2.9	Staff	Print a formatted receipt for the products on screen / via a docket printer	Customers are able to keep the evidence which shows the bill is paid.	M	I need to provide receipt to customer.	I click on "Print Receipt" button.	A formatted receipt should be printed.	2
2.10	Staff	Print a store copy of hiring contract	I am able to keep the evidence which shows the equipment has been hired by the customer.	M	I need to keep a store copy of the hiring contract into store.	I click on "Print Store Copy of Contract" button.	A store copy of hiring contract should be printed.	2
2.11	Staff	Print a customer copy of hiring contract	Customers are able to keep the evidence which shows the equipment has been hired by the customer.	M	I need to provide a customer copy of the hiring contract to customer.	I click on "Print Customer Copy of Contract".	A customer copy of hiring contract should be printed.	2
2.12	Staff	Post the order to Retail Manager via <a href="#">SQUIZ Z.com</a>	The orders can be archived.	M	I need to archived the order.	One Hiring transaction is completed.	The order will be automatically archived.	2
2.13	Staff	After the Hiring is completed, all unregistered equipment users will be added to the customer list as unregistered users.	Record the user's name and birthday. The account status is incomplete.	M	I need to add all the user to the customer list.	One Hiring transaction is completed.	All unregistered equipment users will be added to the customer list as unregistered users. Record the user's name, birthday, and creation time.	2
2.14	Staff	In the process of information transmission, the data is encrypted.	Reduce the risk of users' personal information leakage.	C	I need to transmit information.	Process of information transmission.	User personal data will be more secure.	2

## V3.0 User Story Table

ID	As	I Want To	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1: Equipment Groups / Equipment Packages / Stock Packages (mainly backend work)								
3.1.1	Business owner	Completely build synchronize mechanism between Squizz & Roky Valley	ensure the new website have no problem with synchronization.		I want to synchronize the product from squizz	there are new products' information being updated	the products information should be retrieved into the database	
Epic 2: Equipment Groups / Equipment Packages / Stock Packages (mainly backend work)								
3.2.1	Staff	I can register our new procurement equipment into the database by online UI.	I can manage it or do further operation(e.g. hire out) on it.		I want to register our new procurement equipment	there is any new equipment that needs to be registered	the new procurement equipment should be registered successfully	
3.2.2	Staff	(inherit from 3.2.1)There are different types of equipment we have, when I do the new equipment registration, the UI must allow me to manipulate multiple attributes of the type of product.(e.g. clothes: size, length, width. boots: size, skill_level, ages. pole: length, trail_type....etc.)	I can manage new equipment by adding multiple attributes belongs to.(Create)		I want to manage new equipment by adding multiple attributes	there is any new attributes that needs to be added	the new procurement equipment should be added successfully	
			I can somehow view all types of equipment and their attributes after registered. (Retrieve)		I want to view all types of equipment and their attributes	after any operations toward equipment	the new procurement equipment should be browsed successfully	
			I can update equipment with its attributes after registration. (Update)		I want to update equipment with its attributes	there is any new attributes that needs to be updated	the new procurement equipment should be updated successfully	
			I can delete equipment so as its attributes after registered. (Delete)		I want to delete equipment	there is any equipment that needs to be deleted	the new procurement equipment should be deleted successfully	
3.2.3	Staff	I can even do the CRUD operation (3.2.2) on item pictures for management purpose and display to the customer.	The picture of products or packages are shown either on customer UI or staff UI , which increases aesthetic effect and readability.		I want to see and manage products' pictures on UI	there is any product in my registered properties	the new procurement equipment should be manipulated successfully	
3.2.4	Staff	I can manage a package, by CRUD operations	I can create a new package by selecting category, age_group, skill_level.(Create)		I want to create a new package	any purpose that packages need to be created	the new package should be created successfully	
			I can view the package shown on both staff view and customer view(Retrieve)		I want to view the package	any purpose that packages need to be seen	the new package should be preview successfully	
			I can update the package content(Update)		I want to update the package content	any purpose that packages need to be updated	the new package should be updated successfully	

			I can delete the package(Delete)		I want to delete the package	any purpose that packages need to be deleted	the new package should be deleted successfully	
3.2.5	Staff	I want the current function that we use on the filmmaker will be replaced by the currently developed website.	When a customer arrives at the store, I key in an invoice/order number, all the customer information that he filled in will be shown on my staff mode(e.g the name, number of people, age, tall, what type of equipment and package they placed the order....etc).		as a staff, I want all the filmmaker functions that I used to assign equipment being transferred to the website.	I originally need the filmmaker to assign equipment to customers	the equipment should be assigned to customers and recorded successfully	
			I can manually assign IDs of those equipments going to be hired out, and the rest of the information related to equipment will automatically be shown, and mark those items as hired,.  Just exactly like what we did on filmmaker now		as a staff, I want all the filmmaker functions that I used to assign equipment being transferred to the website.	I originally need the filmmaker to do further operations for customers	the relevant operation originally be done by filmmaker should also can be done in website successfully	
<b>Epic 3: Hiring Equipment Register Process (stock in / stock hired) with a Calendar functionality(UI mainly frontend work)</b>								
3.3.1	Staff	I can preview the availability of each package (better can filter by different package title) on UI (better pair with calendar). - this based on backend configuration on Epic1	I would clearly know all my packages' status (how many left/how many out/ on which dates).		as a staff, I want to preview the availability of each package	I need to manage the packages	I am able to preview all packages	
3.3.2	Staff	I can preview the availability of different types of equipment (better can filter by type of item) on UI (better pair with calendar) - this based on backend configuration on Epic1	I would clearly know all my equipments' status (how many left/how many out/ on which dates).		as a staff, I want to preview the availability of different types of equipment	I need to manage the equipment	I am able to preview all packages that available	

## V2.0 User Story Table

ID	As	I Want To	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1: Synchronization machenism between Squizz & Rocky Valley								
3.1	Business owner	Update the existing database and build a machenism to import new data from the Squizz server using their APIs.						
Epic 2: Equipment Groups / Equipment Packages / Stock Packages (mainly backend work)								
3.2.1	Developer	Develop Equipment Groups and Equipment Packages and Stock Packages based on product synced via <a href="https://www.squizz.com">SQUIZZ.com</a>	the packages/group schema can be used at frontend/backend, even for building db tables		subtasks- this step needs to work with other teams as a whole: <ul style="list-style-type: none"><li>re-think the database schema(tables) for group/package of products and related database operations.</li><li>update the existing database, the old database schema(tables) are irrelevant to us.</li><li>create dummy data for developing stage.</li><li>insert/pull real data from SQUIZZ.</li></ul>			
3.2.2	Staff	View and manage the Equipment Groups and Equipment Packages and Stock Packages by UI (pages)	I can Create new product, select and put it into Groups/Packages		I want to upload a new product.	I enter an admin UI by admin account	the product should be stored into the database	
			I can Retrive a product, preview it's status on UI (pages), for further operations		I want to view the new product I just uploaded on pages where should be shown on.	I enter an admin UI by admin account	the product should be retrieved from the database , appear on admin UI	
			I can Update a product info, depend on different usage purpose (e.g. in/out of stock, available for lease...etc)		I want to update any information of a product.	I enter an admin UI by admin account	the product information should be updated within the database	

			I can Delete a product, let it disappear on UI or database.		I want to delete a product.	I enter an admin UI by admin account	the product and related information should be deleted from the database	
3.2.3	Customer	View which bundles are available at discounted prices (supported by the Equipment Groups, Equipment Packages, Stock Packages managed by the staff)	I can place an order for leasing or buying		I want to buy /lease a product	I enter a customer UI by a registered account	I am able to see products available for buying/leasing.	
<b>Epic 3: Hiring Equipment Register Process (stock in / stock hired) with a Calendar functionality(UI mainly frontend work)</b>								
3.3.1	Developer	Develop a Hiring Equipment Register (stock in / stock hired) with a Calendar	Customer/ Staff are able to browse all the stock in / stock hired information along with dates.		subtasks- this step needs to work with other teams as a whole: <ul style="list-style-type: none"> <li>decide what information should be shown depend on customer /staff view</li> <li>design the calendar UI visual layout, check with 3teams as a whole</li> <li>decide which team would use of the calendar of what feature, base on their requirement</li> <li>decide which UI feature belongs to which team's scope and breaking down the coding scope.</li> </ul>			
3.3.2	Staff	Have access to the Hiring Equipment Register (stock in / stock hired) with a Calendar functionality <b>with a full view (staff mode)</b> .	I can do the related CRUD (Create-Retrieve-Update-Delete) operations on all products		I want to do the CRUD on products that <b>related to product management</b> with Calendar	I enter the calendar by admin mode	I can view all the options (buttons) that allow me to do with it.	
3.3.3	Staff	Have access to the Hiring Equipment Register (stock in / stock hired) with a Calendar functionality <b>with a full view (staff mode)</b> .	I can even do the related CRUD (Create-Retrieve-Update-Delete) operations on customer information  (or should be on other pages, different from the Calendar page, TBD)		I want to do the CRUD on customer info that <b>related to customer management</b> with Calendar	I enter the calendar by admin mode	I can view all the options (buttons) that allow me to do with it.	
3.3.4	Customer	Have access to the Hiring Equipment Register (stock in versus stock hired) with a Calendar, or other pages, <b>to manage my hiring</b> .	I can manage my hiring equipment by selecting equipment, date, number... etc.		I want to place a new hiring.	I enter the calendar by a registered account (customer mode)	I can view all the options (buttons) on the Calendar page that allow me to do with it.	
3.3.5	Customer	Have access to the Hiring Equipment Register (stock in versus stock hired) with a Calendar, or other pages, <b>to manage my user information</b> .	I can manage my user group setting for the hiring equipment (e.g as behalf of my family to hire all types of equipment at a time)		I want to change my hiring info, even add a new friend / new group	I enter the calendar by a registered account (customer mode)	I can view all the options (buttons) on the Calendar page that allow me to do with it.	

## V1.0 User Story Table

ID	As	I Want To	So that	Priority	Acceptance Criteria	Sprint
<b>Epic 1: Equipment Groups and Equipment Packages and Stock Packages</b>						
3.1.1	Developer	Develop Equipment Groups and Equipment Packages and Stock Packages based on product synced via SQUIZZ.com	Staff could manage the Equipment Groups and Equipment Packages and Stock Packages, and Customers could view these groups and packages			
3.1.2	Staff	View and manage the Equipment Groups and Equipment Packages and Stock Packages on Squizz.com				
3.1.3	Customer	View which bundles are available at discounted prices (supported by the Equipment Groups, Equipment Packages, Stock Packages managed by the staff)
