V2.0 User Story Table

ID	As	I Want To	So that	Priority	Acceptance Criteria			Sprint
					Given	When	Then	
Epic 1	: Equipment	Groups / Equipment Packages / Stock	Packages (mainly backend v	work)				
3.1.1	Developer	Develop Equipment Groups and Equipment Packages and Stock Packages based on product synced via SQUIZZ.com	the packages/group schema can be used at frontend/backend, even for building db tables		subtasks- this step needs to work with other teams as a whole: • re-think the database schema(tables) for group/package of products and related database operations. • update the existing database, the old database schema(tables) are irrelevant to us. • create dummy data for developing stage. • insert/pull real data from SQUIZZ.			
3.1.2	Staff	View and manage the Equipment Groups and Equipment Packages and Stock Packages by UI (pages)	I can Create new product, select and put it into Groups/Packages		I want to upload a new product.	I enter an admin UI by admin account	the product should be stored into the database	

			I can Retrive a product, preview it's status on UI (pages), for further operations		I want to view the new product I just uploaded on pages where should be shown on.	I enter an admin UI by admin account	the product should be retrieved from the database , appear on admin UI	
			I can Update a product info, depend on different usage purpose (e.g. in/out of stock, available for leaseetc)		I want to update any information of a product.	I enter an admin UI by admin account	the product information should be updated within the database	
			I can Delete a product, let it disappear on UI or database.		I want to delete a product.	I enter an admin UI by admin account	the product and related information should be deleted from the database	
3.1.3	Customer	View which bundles are available at discounted prices (supported by the Equipment Groups, Equipment Packages, Stock Packages managed by the staff)	I can place an order for leasing or buying		I want to buy /lease a product	I enter a customer UI by a registered account	I am able to see products available for buying/leassing.	
Epic 2	: Hiring Equi	pment Register Process (stock in / stoc	k hired) with a Calendar fun	ctionality(UI m	ainly frontend wor	k)		
3.2.1	Developer	Develop a Hiring Equipment Register (stock in / stock hired) with a Calendar	Customer/ Staff are able to browse all the stock in / stock hired information along with dates.		subtasks- this step needs to work with other teams as a whole: • decide what information should be shown depend on customer /staff view • design the calendar UI visual layout, check with 3teams as a whole • decide which team would use of the calendar of what feature, base on their requirement • decide which UI feature belongs to which team's scope and breaking down the coding scope.			
3.2.2	Staff	Have access to the Hiring Equipment Register (stock in / stock hired) with a Calendar functionality with a full view (staff mode).	I can do the related CRUD (Create-Retrieve-Update- Delete) operations on all products		I want to do the CRUD on products that related to product management wit h Calendar	I enter the calendar by admin mode	I can view all the options (buttons) that allow me to do with it.	
3.2.3	Staff	Have access to the Hiring Equipment Register (stock in / stock hired) with a Calendar functionality with a full view (staff mode).	I can even do the related CRUD (Create-Retrieve-Update-Delete) operations on customer information (or should be on other pages, different from the Calendar page, TBD)		I want to do the CRUD on customer info tha t related to customer management wit h Calendar	I enter the calendar by admin mode	I can view all the options (buttons) that allow me to do with it.	
3.2.4	Customer	Have access to the Hiring Equipment Register (stock in versus stock hired) with a Calendar, or other pages, to manage my hiring.	I can manage my hiring equipment by selecting equipment, date, number etc.		I want to place a new hiring.	I enter the calendar by a registered account (customer mode)	I can view all the options (buttons) on the Calendar page that allow me to do with it.	
3.2.5	Customer	Have access to the Hiring Equipment Register (stock in versus stock hired) with a Calendar, or other pages, to manage my user information.	I can manage my user group setting for the hiring equipment (e.g as behalf of my family to hire all types of equipment at a time)		I want to change my hiring info, even add a new friend / new group	I enter the calendar by a registered account (customer mode)	I can view all the options (buttons) on the Calendar page that allow me to do with it.
